1ST YEAR / I Semester

ARCH 101: Basic Design & Visual Arts

Course Educational Objectives (CEOs):

- To introduce the students to the fundamentals and principles of basic design to enable them, to comprehend Design as a creative process of choice-making and statement of intent, to undertake design by application of basic design principles.
- Understanding the human body in space Activities and their relationship with spaces Scales and proportions
- To impart a good foundation in design through hands-on experience in designing simple two-dimensional and three-dimensional compositions.

Course outcomes (COs):

- Students will develop their basic skills & abilities of design expression.,
- Students will learn visual literacy and visual expression, elements and the principle of design, and the skill of rendering using a different medium. acquire the various skills to work with various material
- Freehand: Memory left-brain creativity, Objects taking things apart/ reassembly

At the end of the course,
students will be able to:

Expected skills/knowledge transferred:

Focus: design language

Interpret visual literacy and visual expression; elements and principles of design

Develop the basic skills & abilities to design

Interpret basic vocabulary of design and architecture; Identify and map human activity in space

Infer, represent and communicate design ;

Construct representation and cognitive skills

To impart an understanding of principles of composition, and appreciate design and elements. Exercises complement the lectures and ensure that the students learn to develop

The Course prepares the ground for the students to gain an understanding of the fundamental issues in the design

Students will learn to explore human behaviour & activity through Space,

The student will achieve the capacity to experience space in Time and motion.

The student will learn the basic vocabulary of design

Students will learn the creation &organization of formal elements in works of art

Course overview

- The design provides the framework for understanding design as a new language by sensitizing students to the conceptual, visual, and perceptual issues involved in the design process.
- The design provides the framework for understanding design as a new language by sensitizing students to the conceptual, visual, and perceptual issues involved in the design process. and ways of representing it

Course contents:

| Unit | Syllabus: topic | Subtopic | Teaching hours: |
|------|-----------------|----------|-----------------|
| | Visual arts | | 40hrs. |

Visual arts

Understanding the design field through various exercises

Relationship of basic design to architectural design and design field in general

Analytic reasoning and criteria for judgment of design and developing a vocabulary of the design subject;

Representation skill Elements and principles of design: shapes and patterns;

Teacher Assessment shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

V Introduction to the studio-based iterative design process To develop a small-scale design project for comprehension of 40hrs

design criteria involving the following:

Understanding human activity and behaviour in space by activity mapping, anthropometric studies, etc.

To make, explore, feel and mould space based on design ideas/principles Undertake hands-on work and creative thinking. Explore 'making' through various mediums and techniques of representation.

Introduction to visualization and representation of an architectural environment's spatial qualities like spatial enclosure, depth, height, view, orientation, etc. and tectonic characteristics like surfaces, material, shape, texture, etc.

Sessional work:

Design

Minimum 6 tasks based on elements and principles of composition on sheets and/or models. Minimum one simple spatial design exercise such as a seating area in a public space, bus shelter, kiosks, play area, entrance gate, etc. Demonstrating the application of the design principles and communicating effectively through two and three-dimensional hand-done drawings, sketches, and models.

Visual arts

Minimum 6 tasks based on the composition of sheets and/or models. Minimum one simple spatial design exercise demonstrating the application of the design principles and communicated effectively through two and three-dimensional hand-done drawings, sketches, and models.

This is a studio subject and students should be made to prepare drawings as studio exercises along with the theoretical inputs. The studio week should be supplemented with appropriate site visits.

Sketching techniques: sketching as a tool to develop ideas, sketching as a tool to communicate ideas, collages & montages, model making (paper, thermocol, cardboard, clay, wood, etc.)

Guidelines

The tasks or assignments /problem is to be set from the entire syllabus

The topic of the project is to be displayed on the institute notice board fifteen days in advance of the commencement of the classes

Note:

Evaluation is to be done through viva voce by an external examiner appointed by the university at the institute. Portfolios, after the university exam, shall be retained at the institute level for the viva-voce.

ARCH 103: Building Material & Construction – I

Course Educational Objectives (CEOs):

- To understand the elementary construction methods, explain basic principles and considerations in the construction of buildings

Course outcomes (COs):

- Basic materials of construction: natural and man-made
- Basic building elements and systems of building through case studies.
- Understanding of constructional behaviour of different elements of a construction system, about the properties of materials.
- Keywords, Terms & definitions.
 - The concern with the appropriateness of materials to the context
 - Load-bearing system

At the end of the course, students will be able to

Explain the properties of building construction materials and their use in building construction.

Give an outline of building construction systems and the use of related building elements therein.

Name building elements and basic building construction processes.

To understand the techniques of construction of a simple load-bearing structure with simple materials like brick, stone, etc. Knowledge required for specifying appropriate materials for various spaces in buildings

FOCUS: Building Materials and Load Bearing Const. Systems

Students will get an understanding of the materials of construction, basic principles of construction, and elements of buildings through theory, relevant drawing & experience.

Students will get an understanding of materials and building systems in a broad overview.

Students will learn vocabulary related to building elements and construction.

Course Overview:

- This course is a combination of lecture & studio classes aimed at developing the student's understanding of material properties and construction techniques with hands-on construction yard assignments to introduce the methods and techniques of construction of basic elements of a simple building and provide information on the properties, use, installation and costs of basic building materials.

Course contents:

| Unit | Syllabus: topic | Subtopic | Teaching hours: |
|--|---|---|-----------------|
| Introduction to basic elements of buildings and their importance: Structural concepts, Load bearing & non-load bearing walls; Construction details; Earthquake resistance; Types - walls, piers, footings, retaining structures; | | | |
| I | Introduction to Building Construction Materials | Introduction to building construction materials and their classification based on their properties: ceramic, metals, composites, polymers, and organic materials. Relationship of material properties to techniques and processes of working with materials. | 12 hrs. |
| II | Introduction elements of Super | Introduction to basic building elements and their role in a building: foundation, plinth, walls, opening, roof, floor, etc. | 12 hrs. |

Teacher Assessment shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

| | | | |
|-----|------------------------------------|--|--------|
| | Structure and Sub-Structure | Introduction to building construction system and its elements e.g. - Load Bearing, Framed and Composite structures. Explanation through case studies, measure drawing, etc. | |
| III | Introduction to masonry structures | <ul style="list-style-type: none"> Introduction to different types of Masonry Understanding principles of Brick and Stone Masonry. Composition of brick earth and their properties, the manufacturing process of bricks, classification of bricks, test for bricks, a special type of bricks, substitutes for bricks, etc. Bonds, principles, and applications in buildings. | 7 hrs. |
| IV | Brick walls | <ul style="list-style-type: none"> Brick Masonry: Brick: Brick bonds: walls, Garden wall bonding. Brick walls in the different bond ends, corners and junctions. Types of Masonry walls: load-bearing, partition, cavity, jali, Composite masonry, etc. | 7 hrs. |
| V | Mud and stone | <ul style="list-style-type: none"> Stone Masonry: Stone: Rubble work Introduction to Mud and Stone construction and techniques of building with mud and stone. Demonstration of understanding by making models, drawings, hands-on work, etc. Composite masonry: Cladding: Openings: Lintels: Arches: Ground and upper floors: Flooring Finishes: Flat roofs | 7 hrs. |

Sessional work:

Note:

The classwork and home assignments should include appropriate site visits by the students. The student will maintain field observations/record books.

At least two exercises are to be done in the construction yard.

Each Unit should include a market survey and construction site to visit compulsorily with the studio working on sheets a minimum of 12 to 15 Nos A-1 Sheets

ARCH 104: Architectural Graphics & Drawing – I

Course Educational Objectives (CEOs):

- To introduce architectural drawing techniques and facilitate effective visual communication. The students will develop knowledge of orthographic projections, measured drawing, and skills in FreeHand sketching
- Course outcomes (COs):**

At the end of the course, students will be able to

Make use of Orthographic Projection Drawing as a representation tool & medium of effective visual communication.

Appraise skills in visualization

Maximize the potential of two-dimensional drawing as a tool for design development and representation.

Expected Skills / Knowledge Transferred:

Make use of Architectural Drawing as a representation tool & medium of effective visual communication.

Focus: Students will learn the basic drafting and visualization skills (manual)

Students will learn to Scale drawings and conventional architectural representations in drawings and graphics.

Students will develop the understanding & skills of technical drawing as a tool for visual communication.

Students will learn basic drafting and visualization skills

Course Overview:

- The course introduces the fundamental techniques of architectural drawing and develops the appropriate skills for visualization and representation.

Course Contents:

| Unit. | Syllabus: Topic | Subtopic | Teaching Hours: |
|-------------------------------|--|--|-----------------|
| Introduction; Drawing: | | | |
| I | Geometrical Construction | Basic and analytical geometry – Geometric Constructions | 8 hrs. |
| II | Orthographic Projection, Auxiliary Projection, and Isometric views | Geometrical Drawing: Architectural Symbols: Measuring and Drawing to Scale: Constructing and dividing lines and angles; Constructing and dividing circles and arcs; Constructing Regular Polygons; Description of Plane Curves; Architectural Symbols: Orthographic projection and auxiliary projection; Axonometric views, isometric views, and other views.; Projections of Points, Lines, and Planes ; Projections of solids (Prisms & Pyramids) ;Tilted Objects ;Sections of Solids ; Interpenetrations of Solids (Basic).Description of Plane Curves; Solid Geometry: Sections of solid | 18 hrs. |
| III | Development of Surfaces | Introduction of D.O.S ; Regular Polygons and Platonic Solids ; D.O.S of hip roof & Gable roofs ; D.O.S of sectioned objects; | 8 hrs. |
| IV | Allied Techniques (Part 1 of 2) | Visualization Software (Sketch-UP, Rhino, or equivalents); Model Making; Various freehand sketching exercises to strengthen visualization and | 8 hrs. |

FreeHand
Drawings

representation;.

FreeHand Drawings: line strokes, light and shade 3hrs. techniques of simple, natural, and 3D geometric forms. Study of proportions and scale; structure and axes of objects; Outdoor sketching of simple building forms

**Sessional work:
Guidelines**

Assignments /Tasks are to be set from the entire syllabus; The topic of the project is to be displayed on the Institute Notice Board fifteen days - a week time in advance OF the commencement of the classes

Note:

This is a studio subject and students should be made to prepare drawings as studio exercises along with the theoretical inputs. The studio work should be around 12 to 15 A1 sheets for appropriate site visits.

Evaluation is to be done through viva voce by an external examiner appointed by the university at the Institute. Portfolios, after the university exam, shall be retained at the Institute level for the viva-voice

ARCH 105: History of Architecture & Culture-1

Course Educational Objectives (CEOs):

To explain to the students the evolution of architecture over time with special emphasis on social, religious, and environmental factors. To make the students understand the developments in construction technology in different periods.

Course outcomes (COs):

At the end of the course, students will be able to

Outline the prehistory and timeline of human evolution
Discover various cultural expressions

Compare Indian history and its cultural values

Develop an understanding of the relationship between people and place

Acquire knowledge to identify the common characteristics among the monuments of a particular style and good practices of architecture in the past

Acquire graphic skills to present a building, analyze its elements and explain the composition.

The student will learn an appreciation of various cultural expressions through instruction and experience

The students will develop an appreciation of the rigorous thought processes in the field of science

Focus: Humanities

Course Overview:

History of Architecture to be studied as the development of building forms in response to social, religious, aesthetic, and environmental factors. It focuses on the three-dimensional forms plan forms, façade organization, structural solution, construction methods, and ornamentation as well as focuses on the general trends and not on specific e.g. of buildings.

Course Contents:

| Unit | Syllabus: | Subtopic | Teaching Hours: |
|---|--|---|-----------------|
| | Topic | | |
| Detailed study & analysis of architectural design fundamentals through significant e.g., in the light of the following for the periods mentioned in the modules. Teaching & learning through reading, discussions, debate & critical judgment | | | |
| I | Historical timeline of human evolution | <ul style="list-style-type: none"> The history of the earth Human evolution – stages and timeline Paleolithic and Neolithic society Journey towards modern man and civility Philosophical explorations into man's place in the world, ethics, aesthetics, and epistemology as systems of the relationship between man, society, artefacts, and thought. The discipline of history and the continuous observation and criticism of society Critical thinking – its basis and intent | 6 hrs. |
| II | Culture and society | What are culture and society Elements of culture Symbols and culture Understanding art as an expression of culture. Exposition of aspects of literature, performing arts - theatre, dance, music and plastic arts; painting, sculpture, film, in terms of basic characteristics and development of each field and first-hand experience of some work. | 8 hrs. |
| III | Indian culture | History of India Unity and diversity Cultural values and identity | 6 hrs. |

ARCH 107: Theory of Structures -I

Course Educational Objectives (CEOs):

To enable students to understand the concepts of structures in architecture, the use of different structural materials used for various buildings

Course outcomes (COs):

At the end of the course, students will be able to Explain conceptual understanding of structural behaviour Relate basic structural systems.

Apply technical vocabulary related to structural design

Expected Skills Knowledge Transferred: The students shall be confident about the structural action of the various elements.

Further, he will have sufficient knowledge about the various long-span structures.

Students will get a conceptual understanding of structural behaviour to learn basic structural systems.

Focus: Civil The student will understand the technical vocabulary related to structure.

Course Overview:

To inculcate in the student an awareness of basic structural principles used in various building systems

Students will understand the structural behaviour of materials, basic structural systems

Students will understand the loading mechanism of structural systems

Basic principles of mechanics and behaviour of elements of structures.

Course Contents:

| Unit | Syllabus: | Subtopic | Teaching Hours: |
|------|---|--|-----------------|
| I | Process of the building structure | Structure and Structural form Structure and its importance in Architecture Introduction: Structural Concepts: Force, the equilibrium of forces; a system of forces, resultant, equilibrant Parallelogram law, LOADS OF STRUCTURE: STRUCTURAL MATERIALS | 6hrs |
| II | The broad categorization of structural system | Structural form - solid, Surface, skeleton, Membrane, hybrid Structural form - in Nature Structural form - man-made Different methods of categorization of the structural system Mechanical properties of structural material Structural systems based on the mechanism of transfer of load Analysis of trusses, Problem of Span, Stress, Strain Tension And Compression Members Concepts of various structural systems – Cables – Trusses – Arches – Cable Roofs – Space Frames – Flat Slabs. Types of Beams, Cantilever: Types of loads Curved Structures and Long-Span Buildings Theory of Vaults and Domes – Construction of Masonry Vaults and Domes – Concepts of Reinforced Concrete Shells, Domes and Vaults – Folded Plate Roofs – tensile structures, | 6hrs |
| III | States of stresses | Tensile, compressive, shear, torsion, bending | 6hrs |

| | | | |
|----|-----------------------------------|--|------|
| IV | Basic requirements of a structure | Structural material: strength, stiffness, shape Equilibrium: Vertical, Horizontal, Rational settlement and earthquake behaviour | 6hrs |
| V | Types of loads & supports | Structural Elements: Strut, tie, beam, slab/plate, panel Structural Element behaviour: Tensile, compressive, shear, torsion, bending Definition of the centroid, a line of symmetry, the centroid for some standard shapes, calculation of centroid for shapes like L, T, C, I Sections, etc., a moment of inertia, Derivation of M.I formula for Rectangle, Circle, Triangle, calculation of M.I for L, T, C, I Sections, etc., Types of joints, lap joint & butt joint, failure of riveted joints, the strength of the joint, efficiency of the joint, Unwin's formula, chain riveting & Diamond Riveting | 6hrs |

Sessional work:

Guidelines

Assignments /Tasks are to be set from the entire syllabus; The topic of the project is to be displayed on the Institute Notice Board fifteen days - a week time in advance Of the commencement of the classes

Assignments

Site Studies and Visual aspects. Numerical and understanding of structural concepts

Note:

This course is to be taught as an introduction with special reference to the structure in nature viz. Trees, the Human body, and other examples of unusual rock formations are created by the forces of nature like wind and water.

The teaching in this subject must bring out:

The predominant pictorial nature of the Architect's language is the physical-mechanical essence of the subject matter.

The orientation of all Architectural efforts and their relation to form and space.

Emphasis should be laid on the understating of building evolution and form. The continuous evaluation shall be made of students' work based on various models, assignments, and sketches.

More emphasis while teaching shall be laid on learning by doing by students involving the making of 3-D models (to give the students different spatial experiences and make them understand the basics/principles involved)

ARCH 108: Workshop -I

Course Educational Objectives (CEOs):

To introduce various fabrication skills and techniques necessary to produce scale- models, and encourage the preparation of models as an essential phase in design development and evaluation. Developing overall skills in understanding various tools, processes, and materials.

Course outcomes (COs):

At the end of the course, students will be able to

The student will learn different methods and techniques to represent an idea & thoughts

The student will have various representation techniques at her disposal

The student will be able to represent a design idea 3 dimensionally
Use of presentation software

Expected Skills / Knowledge Transferred:

Focus: Manual Skills

The student will learn different methods and techniques to represent an idea & thoughts

The student will have various representation techniques at her disposal

The student will be able to represent a design idea 3 dimensionally
Use of presentation software

Course Overview:

The course provides the foundation and capability to represent the concepts three-dimensionally,
Sketching Techniques

Course Contents:

| Unit | Syllabus: Topic | Subtopic | Teaching Hours: |
|------|---|---|----------------------------|
| I | Sketching: | Sketching is a tool for developing ideas, communicating ideas | 4 hrs |
| II | Craft: | Collages & Montages, Form Work | 4 hrs. |
| III | Model Making | Model Making (Paper, Pharmacol, Cardboard, Clay, Wood, Etc.) Understanding various basic tools used for carpentry joinery and fabrication. | 10 hrs. |
| | | Understanding various building materials and their tools used for cutting, joining and extension. Handling materials like wood, marble, steel, MS, plywood, POP, Aluminum, etc. | |
| | | Understanding nailing, screwing, riveting and their various conditions and types of applications. | |
| IV | Basic Use of Computers: | Expression of forms- By handling various materials. | 4 hrs. |
| V | Photography: Vocabulary development /reinforcement | Presentations Software (MS Office, Prezi & Others) inbuilt models, using lighting and natural background • Introduction to Architectural Keywords • Meanings to Architectural Keywords Making Sense of Architectural Keywords through the Masters' Works | 4 hrs. 4 hrs. 4 hrs. |

Teacher Assessment shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

Sessional work:

Guidelines

Assignments /Tasks are to be set from the entire syllabus; The topic of the project is to be displayed on the Institute Notice Board fifteen days - a week time in advance OF the commencement of the classes

Continuous Evaluation shall be made of students' work based on various models, sketch assignments, and market surveys.

One Major And the rest minor tasks are to be set from the entire syllabus

Assignments:

All the above modules will be evaluated in the form of verbal or written presentation of artwork, drawing work, model making, photography, etc. At least three major assignments involving the individual students to fabricate

Scale model of a piece of furniture, Presentation of models, mock-up of an Everyday Object, Three-dimensional Forms, etc.

Documentation of the important phases of fabrication is a must which shall become the basis for internal evaluation.

Evaluation is to be done through viva voce by an external examiner appointed by the university at the Institute. Portfolios, after the university exam, shall be retained at the Institute level for the viva-voice

AIIMS APPROVED CURRICULUM FOR THE COURSE SURVEYING & LEVELLING

Course Educational Objectives (CEOs):

To explain the techniques and instruments used in a survey of land tracts

Course outcomes (COs):

At the end of the course, students will be able to Interpret the concept, instruments, and methods of surveying and levelling. Make use of concepts and methods of surveying and levelling. Appraise the relevance of surveying and levelling in the Architectural field

Expected Skills / Knowledge Transferred:

Focus: Manual Skills

Dexterity; Knowledge of materials and their properties; skills; visualization skills;

The student will learn different methods and techniques to represent an idea & thoughts. The student will have various representation techniques at her disposal. The student will be able to represent a design idea 3 dimensionally. Use of presentation software

Course Overview:

To explain the different techniques and instruments used in a survey of land tracts

Course Contents:

| Unit | Syllabus: Topic | Subtopic | Teaching G Hours: |
|------|---------------------------|--|-------------------|
| I | Introduction of surveying | Surveying and Architecture Introduction to surveying: Definition, object, uses, classification of the survey. Formulae are used in the measurement of land with geometrical and abstract configurations to work out Areas, volumes, and other quantities. Principles of surveying, scales, and types of scale, Accuracy & Errors | 2 hrs. |
| II | Linear Measurements | Measurement of distance with chain, tape, EDM, GPS, etc., measurement on sloping ground, obstacles, Errors in measurements ;Selection of survey station. Chain line, Offset, oblique offset, tie line, check lines, ranging : Chain Surveying: errors and corrections, the composition of Areas;Compass Surveying Field book plotting. | 4 hrs. |
| | Measurements of Angles | Various parts of Compass, Types, Errors affecting angular measurements ;Types of the traverse, Orientation of traverse surveys ,Theodolite, Theodolite Traversing: Types of Theodolites, Definitions, temporary adjustment of theodolite, Plane Table Survey: Definitions, Types of levels, methods of levelling. | 4 hrs. |
| III | Levelling | Various parts of a dumpy level. Levelling Levelling staff, technical terms used in levelling. Contouring: Definition, Characteristics of contour, plotting using radial line & square grids Introduction. ;Equipment required. ; Working with a plain table. ; Errors in the plane table. | 6hrs |
| | Plane table surveying | | 4 hrs |

HUCS 101: Communication Skills

Course Educational Objectives (CEO's):

Develop the second language learners' ability to enhance and demonstrate skills

Acquire English language skills to further their studies at advanced levels

Become more confident and active participants in all aspects of their undergraduate programs

Course outcomes (COs):

- At the end of the course, students will be able to
- Demonstrate understanding of the English Language
 - Interpret the basic structure, grammar, vocabulary, and speech construction
 - Develop an Understanding of Keywords in Architecture
 - Build art of presentation in basic writing and public speaking with a focus on meaning.
 - interpretation, accent, rhythm, etc. of the keywords in the Architecture
 - The students should be able to: Have confidence in their ability to read, comprehend, organise and retain written information; Write grammatically correct sentences for various forms of written communication to express themselves
 - Adapt skills of listening, reading, understanding, speaking, writing & translation in English students should be able to: Have confidence in their ability to read, comprehend, organise and retain written information; Write grammatically correct sentences for various forms of written communication to express themselves
- Expected Skills / Knowledge Transferred:
- Focus: Manual Skills

Course Overview:

To provide an adequate mastery of technical and communicative English Language training primarily, reading and writing skills, secondarily listening and speaking skills.

Course Contents:

| Sr. No. | Syllabus: Topic | Subtopic | Teaching Hours: |
|---------|-----------------|--|-----------------|

ARCH 110: Study Tour I

Study Tour /Field Studio: Syllabus: 1 week (6 hours/week) Total Teaching hours: 30 Hr.

Course Educational Objectives (CEOs):

To analyze various art forms, and understand the techniques involved in creative thinking.

Course outcomes (COs):

At the end of the course, students will be able to

Students will get an understanding of the "synthesis of learning from various courses" by observing; registering & mapping built buildings.

- Programme outcome will be extremely valuable in creating a knowledge base on the architecture field not only in India but in nearby countries as well.
- Production of Accurate and precise drawings of many a monument, institutions, and settlements in India, which become a basis for future research.

Expected Skills Knowledge Transferred:

Different skills for creative thinking, understanding various art forms and appreciating art and architecture. a paper presentation and a summer case study

Focus: Manual Skills

Provides knowledge on the traditional art form, innovations in and influences on architecture and thinking process in design;

Course Overview:

Students will develop the skills & understanding of measure drawing.

Course Contents:

| Unit | Syllabus: Topic | Subtopic | Teaching Hours: |
|------|-----------------|----------|-----------------|
|------|-----------------|----------|-----------------|

The STUDY TOUR (SBP) at the Institute of Architecture is a unique contribution to Architectural education. Initially called measure drawings, it is intended to take the students out into the field to get a first-hand experience of traditionally built environments. This subject recognizes the value of traditional architecture as well as the importance of field experiences and travels in the learning of architecture. The students are encouraged to learn about not only the architectural form but also related components of architectural relevance.

- Student and faculty members stay at the selected Village for 8 to 15 days.
- Students will get a comprehensive awareness of that village.
- Students will measure the built environment in terms of a cluster of houses, individual houses, and building elements of that house.
- Students will also document the social, cultural, and environmental aspects of that village.
- Students came back to the institute and made the final Drawings and reports within the remaining days.

Sessional work:

Guidelines Assignments /Tasks are to be set from the entire syllabus; The topic of the project is to be displayed on the Institute Notice Board fifteen days - a week time in advance OF the commencement of the classes

Course Contents:

Unit **Syllabus: Topic**

Sub Topic

Teaching hours

I Introduction to mud and mirror work

- Basic rules& principles

9 hours

Mud and Mirror Work (also known as Lippan Kaam) is a traditional mural craft of Kutch.

Clay and dried donkey dung powder are mixed in almost equal proportions to make a thin slurry. This slurry is applied as the base of the artwork.

II Making Geometrical Design, and Tracing on MDR Making Dough.

Mike en Place or "everything in its place"....

6 Hours

- Mixing.

- Bulk (Primary) Fermentation.

- Punching Down.

- Benching.

- Shaping and Panning the Loaves.

- Proofing the Leaf (Secondary Fermentation)

- Step 10: Stage 10: Bakine.

III Tools and Raw Materials

- The tools and raw materials used

6 hours

- Wooden board/ Hardboard

- Clay, Glue, Chalk Powder, Sawdust,

- Scale, Pencil, Frame, Color, Mirror, Waste Cloth

| | Hands-on pottery the wheel-making pots/vases. | <ul style="list-style-type: none"> Lubrication is Vital while Throwing The Proper Method for Centering Clay on the Potter's Wheel. Speed and Movement While Throwing. Compress the Pot's Rim after Every Throw The Mechanics of Throwing a Pot's Walls Sponge Up Excess Liquid after Each Throw Third Throw of the Pot's Walls | 6 hours |

ARCH 119.2 Collages and Montages

Collages and Montages

Students will learn a brief history of collages and montages; Students will learn to explore using techniques of collages and montages.

Brief History of collages & montages; Different types of collages; Different types of montages; Collages and Montages as a tool to represent ideas

Course outcomes (COs):

At the end of the course, students will be able to

Tell different types and techniques of collages and/or montages
Illustrate the importance of collages and/or montages as a tool to represent and communicate ideas
impose a collage/montage

Expected Skills
Knowledge Transferred:
Focus: Manual Skills

better grooming than just books and theories.

The creative electives provide an opportunity to express talents that are different from architecture but related to imagination, visualization & creation. They offer hands-on experience of unique ingenuity & workmanship. The essence of a creative domain can be achieved by exploring different materials, techniques, and processes; developing creative products; and finishing & presenting the product for the concepts that evolved. The outcome will be through portfolio & presentations.

Teacher Assessment shall be based following components: QMAs/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

| Unit | Syllabus: Topic | Sub Topic | Teaching hours: |
|------|--------------------------------------|--|-----------------|
| I | Brief History of collages & montages | Brief Timeline, manual & digital ways, modern approaches etc | 3 hours |
| II | Different types of collages | 2D Collages ;3D Collages | 21 hours |
| III | Different types of Montages | | 21 hours |

Suggested Readings:

1. Simpson, L., & Alexander, E. (2018). Lorna Simpson collages. San Francisco: Chronicle Books.
2. Moore, A. (2018). Collage Ideas Book. Octopus Publishing Group.
3. Taylor, T., & Plowman, R. (2010). Masters: Collage: Major works by leading artists. New York: Lark Books.

ARCH 119.3 Sketching, rendering and Caricature

Freehand line sketching and drawing of natural and manmade. Study of shades and shadows,

Sketching of Historic or newly built-up structures of Architectural importance using different mediums.

Understanding of human proportion about compositions; freehand sketching of volumes, spaces & human figures. Indoor objects - still Life – Furniture, Equipment - Understanding Depth, light, Shade, Shadow Etc., Outdoor sketching: Natural Forms/ Built Forms, Understanding variety in Forms. Sketching Human Form: Anatomy and Expressions - Graphical Representations. Colour: Freehand rendering of Landscapes & builtscapes including human figures; Exercises; Application of Color in Architectural rendering; Relation between colour & texture.

Rendering techniques:

Introduction to surfaces and media, observation, recording and basic representation techniques in different media through drawing pencil, pen, brush, charcoal, crayons etc. general approach to rendering, Entourage, Treatment of the sky, clouds, landscape elements, human figures, foreground and surroundings, shadow projections in renderings.

Graphic skills and Presentation Techniques: Page layout and Composition grids; Illustration techniques; Portfolio design and formats; Digital techniques in graphics
