*Teacher Assessment shall be based following components: Quiz/Assignment/ Project/Participation in Class.

COURSE EDUCATIONAL OBJECTIVES (CEOS):

The course aims to provide students with the skills and knowledge to prepare the preliminary research proposal. Also, to enable students to frame effective researches questions and identify appropriate peer-reviewed literature relevant to their research topic.

COURSE OUTCOMES (COS):

After the completion of the course the students should be able to:

- Conceptualize problems from complex, real-world situations so the problems are meaningful to the intended audience and research-worthy.
- Identify and summarize appropriate peer-reviewed literature relevant to a proposed area of research.
- Prepare constructive, tactful feedback to help colleagues improve their writing.

COURSE CONTENTS :

In continuation to the previous semester thesis, the student is required to analyze the collected data and formulate strategies, policies, principles for the development of the analyzed scenario.

- The students are required to carry out independent research and prepare a thesis on a topic on urban planning selected by them and approved the faculty under the supervision of a research guide allocated by the department.

CORE ELECTIVE

A. CLIMATE RESILIENT URBAN DEVELOPMENT

B. URBAN RENEWAL AND FUTURE SETTLEMENTS

COURSE EDUCATIONAL OBJECTIVES (CEOS):

This course is offered with the aim of proving a direction and supportive parameters for final semester thesis project. The course is evaluated with exercise and documentation of thesis project on any of the following aspects of detailing.

Elective 1 - This course explores the vulnerability of urban populations making emphasis on context specific impacts in low and middle-income nations. Using case studies we will analyse how climate change impacts different social groups in our cities, identifying adaptation and mitigation strategies being currently implemented. It creates a understanding for tools to draw on climate change scientific data and the uncertainty inherent in future projections.

Elective 2 - The process of Urban regeneration has had a major impact on many landscapes, it has even played an important role in history and demographics of cities across the world. Students are required to present their thesis project with futuristic approach in this elective subject. It will give a dimension for sustainable development thinking and well thought interventions in urban planning spaces.

COURSE OUTCOMES (COS):

- To Perform evaluation of climate mitigation and adaptation during planning and design of infrastructure.
- To Select and specify sustainable response and adaptation strategies for infrastructure systems.
- To Discuss the holistic practices in relation to phenomena of climate change applied to infrastructure development and management with reference to the future growth and settlements.
