**Legends:** L - Lecture; T - Tutorial/Teacher Guided Student Activity; P – Practical; C - Credit;

\***Teacher Assessment** shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks

#### Course Educational Objectives (CEOs): The students will -

**CEO1:** understand community at large, its health indices, prevalent nutritional problems their assessment.

**CEO2:** gain knowledge about community nutrition services policies and programs.

#### Course Outcomes (COs): Student should be able to-

**CO1:** acquire knowledge about community health, nutritional assessment, and surveillance.

**CO2:** understand dietary surveys and food security.

**CO3:** familiarize with clinical symptoms of PEM and other diseases.

**CO4:** develop skills of anthropometric assessment.

**CO5:** gain awareness on national and international nutritional programs.

### Syllabus

#### UNIT I

- Concept of community, types of Community, factors affecting health of the community.
- Nutritional assessment and surveillance: meaning, need, objectives and importance.
- Concept of family food security

#### UNIT II

- Assessment of nutritional status: methods and application
- Direct methods – anthropometry, biochemical and clinical examination
- Indirect methods – dietary surveys, vital statistics
