**Legends:** L - Lecture; T - Tutorial/Teacher Guided Student Activity; P – Practical; C - Credit;

**\*Teacher Assessment** shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

**Course Educational Objectives (CEOs):**

The primary objective of the course is to describe and develop knowledge of (A) Casting tools and techniques, (B) joining processes such as welding, brazing, soldering etc. (C) forming processes such rolling, extrusion, forging and sheet metal working (D) machining processes and metal cutting technology.

**Course Outcomes (COs):**

After completion of this course the students will be able to understand and describe the

1. Types of manufacturing processes and casting tools and methods.
2. Joining processes such as welding, brazing, soldering etc.
3. Machining processes, operations and metal cutting technology.
4. Forming processes such as rolling, extrusion, deep drawing, forging and sheet metal working.

**Syllabus**

**Unit – I**

**(9 Hrs)**

**Introduction:** Definition, classification of manufacturing processes, importance of manufacturing.

**Metal Casting Processes:** Introduction to casting and foundry; basic principles of casting; pattern: functions of patterns, types of patterns, pattern allowances, materials used for patterns; pattern design considerations, core, core boxes; moulding: moulding materials, types of mouldings, moulding sand properties and testing, core sand and core making, gating system, runner and riser, pouring and feeding, degasification etc. in casting, various types of casting processes, casting defects.

**Unit - II**

**(9 Hrs)**

**Joining Processes:** Classification of joining processes, principle of welding, soldering, brazing and adhesive bonding; Types of welding processes: arc welding and gas welding processes, TIG welding, MIG welding, spot welding, resistance welding, submerged arc welding, plasma arc welding, thermit welding, electron beam welding, laser beam welding, defects and inspection of welding joints, electrodes, weldability of metals, welding equipments, difference between welding, soldering and brazing.

**Unit - III**

**(9 Hrs)**

**Rolling, Extrusion and Wire Drawing:** Introduction, advantages of mechanical rolling processes, difference between hot and cold working, advantages and disadvantages of cold and hot working processes, types of rolling mills, rolling defects; extrusion of metals: types of extrusion processes, metal flow in extrusion, extrusion equipment & dies, defects and their remedies; wire drawing: classification, advantages, limitations and applications.

**Unit – IV**

**(10 Hrs)**

**Forging and Sheet Metal Working:**

**Forging:** Introduction, classification of forging, open die and closed die forging, types of forging operations, types of forging presses, common forging defects

**Sheet Metal Working:** Sheet Metal properties, miscellaneous sheet metal working operations: shearing & slitting, punching, blanking, coining, piercing, trimming, perfecting, notching, lancing, embossing, stamping, rubber forming, stretch forming, curling, bending, drawing, deep drawing etc. press tool, types of dies used, force requirement, theory of shear, methods of force reduction, lubricants used, pressure and power requirements, defects and their remedies, slitting tools and shear blades.

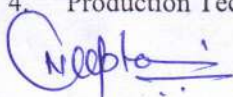

**Unit – V**

**(8 Hrs)**

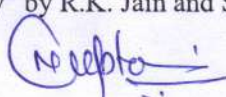

**Introduction of Metal Cutting and Machining Operations:** Metal cutting tools, types of cutting tools and tool materials, single point and multipoint cutting tools and related terms, types of chips formed; working principles, main components and common operations of lathe machines, shaper and planer machines, milling, grinding and drilling machines

**Legends:** L - Lecture; T - Tutorial/Teacher Guided Student Activity; P – Practical; C - Credit;

**\*Teacher Assessment** shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

**Course Educational Objectives (CEOs):**

(A) To gain knowledge of different types of stresses, strain and deformation induced in the mechanical components due to external loads. (B) To study the distribution of various stresses in the mechanical elements such as beams, shafts etc. (C) To study effect of various loading conditions of column and gain knowledge of theories of failure.

**Course Outcomes (COs):**

After completion of this course the students are expected to be able to demonstrate following knowledge, skills and attitudes. The students will be able to

1. Define and memorize mechanical properties of material & select appropriate material for a given working Conditions.
2. Explain simple stresses, bending stress, shear stress, torsion stress, principle stresses, thin and thick cylinder, shaft, springs, columns and theories of failures.
3. Calculate and design structural members subjected to tension, compression, torsion, bending and combined stresses using the fundamental concepts of stress, strain and elastic behavior of materials.
4. Design of shaft and pressure vessels.
5. Justify bending equation and torsion equation and use it to solve the numerical.

**Syllabus**

**Unit – I**

**(8 Hrs)**

**Introduction:** Stress-Strain, uni-axial, bi-axial and tri-axial stresses, tensile & compressive stresses, shear stress, Stress Strain Diagram, Ratio, Modulus of elasticity, Modulus of rigidity, Bulk modulus, Factor of safety.

**Unit – II**

**(9 Hrs)**

**Simple & Compound Stresses:** Deformation due to self-weight, bars of varying sections, composite sections, principle of superposition, strain energy, Transformation of stress and strain, principal stresses, normal and shear stress, Mohr's circle and its application to two and three dimensional analyses, Thermal Stress.

**Unit – III**

**(10 Hrs)**

**Bending and Deflection:** Symmetric member, Deflection of beams, deformation and stress, bending of composite sections, Macaulay's method and Area moment method for deflection of beams

**Unit – IV**

**(8 Hrs)**

**Torsion:** Torsion of circular shafts-solid and hollow, Strength of Shaft and composite shaft, combined bending and torsion, strain energy due to torsion.

**Unit – V**

**(10 Hrs)**

**Columns and Theories of Failure:** Buckling load, Types of end conditions for column, Euler's column theory and its limitations, Rankine- Gordon Formula, Theories of failures: Maximum principal stress theory, Maximum principal strain theory, maximum shear stress theory; maximum strain energy theory, maximum shear strain energy theory; Application of theories to different materials and loading conditions.

**Course Educational Objectives (CEOs):**

The objectives of the course is to develop knowledge of (A) Chassis layout (B) Transmission Systems (C) Control Systems (D) Suspension Systems (E) Vehicle Safety and Motor Vehicle Act

**Course Outcomes (COs):**

After completion of this course the students are expected to be able to demonstrate following knowledge, skills and attitudes.

1. The students will be able to describe the function of a given part of the specified automobile chassis/frame/ body.
2. Students will be able to explain design considerations and features of special purpose vehicles and classify special type of vehicles based on the need and purpose.
3. The students will be able to describe the function and able to select the type of clutch, gear box and transmission system for the given application.
4. The students will be able to Identity different safety systems of vehicles and understanding the motor vehicle act-related terms.

**Syllabus**

**UNIT I**

**Introduction, Vehicle Layout and Chassis**

**Introduction:** Definition, Classification of automobiles, Major components of Automobiles with their function and location.

**Vehicle Layout:** Definition Significance of Vehicle Layout, Different types of vehicle layouts (FEFWD, FERWD, RERWD, 4WD), Advantages, Disadvantages, Applications and comparisons of different types of vehicle layouts.

**Chassis:** Requirement, Function, Classification, Advantages, Disadvantages and applications of Chassis, Basic body nomenclature.

**Special Purpose Vehicles:** Classification of Special Purpose Vehicles based on applications, Wheel type & Track type vehicle, Power Plants, Transmission, Final Drive, Multi-axle vehicles.

**UNIT II**

**Automobile Transmission Systems**

**Clutch:** Function, Requirement, working principle and classification of clutch, Construction and working of single plate, Multiplate and centrifugal clutch.

**Legends:** L - Lecture; T - Tutorial/Teacher Guided Student Activity; P - Practical; C - Credit;

**\*Teacher Assessment** shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

**Gear Box:** Function, Necessity, Classification of gear box, Construction and working of constant mesh and synchro mesh gear box; Epicyclic gear train.

**Transmission:** Function, Construction and working of automatic transmission and semi-automatic transmission, flywheel, torque converter, propeller shaft, universal and slip joint, differential, stub axle, semi floating and fully floating rear axle.

### UNIT III

#### Automobile Control Systems

**Braking System:** Principle of braking, Function and requirement of braking system: Basic terms related to braking (stopping distance, braking efficiency, fading of brakes); Types of braking system: layout, construction, Working of drum, Disc, Hydraulic and air brakes. Master cylinder, Wheel cylinder, Tandem master cylinder, Significance and general procedure of bleeding of brake. Anti-lock braking system.

**Steering System:** Function and requirements of steering system, Basic terms related to steering (steering ratio, turning radius, under steering and over steering), Basic components of steering linkages. Types of steering gear boxes, working of hydraulic and electronic power steering. steering geometry, significance and ranges of camber and caster (Positive, Negative), Toe-in, Toe out, King pin inclination (KPI), steering axis inclination (SAI)

### UNIT IV

**Vehicle Safety:** Survival space requirements, Restraints systems used in automobiles, Types of safety belts, Head restraints, Air bags, Use of energy absorbing systems in automobiles, Impact protection from steering controls, Design of seats for safety, Types of seats. Importance of bumpers, Damageability criteria in bumper designs. Types of safety glass and their requirements, Types of rear-view mirrors and their assessment. Warning devices, Hinges and Latches etc.

### UNIT V

**Motor Vehicle Act:** Introduction, Objectives, and salient Features of M. V. Act 1988 or latest M. V. Act. (After the amendment of M. V. Act 1988), Latest central motor vehicle rules. Important transport terms (definitions) in M. V. Act (Motor Vehicle, Motor Cycle, HGV, MGV, LGV, Public Service Vehicle, Transport Vehicle, Driver Passenger Accident) Organization Structure of Motor Vehicle (RTO) Department, Duties and Responsibilities of RTO, AIMV.

\***Teacher Assessment** shall be based on following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

**Course Objective**

1. To create awareness towards various environmental problems.
2. To create awareness among students towards issues of sustainable development.
3. To expose students towards environment friendly practices of organizations.
4. To sensitize students to act responsibly towards environment.

**Examination Scheme**

The internal assessment of the students' performance will be done out of 40 Marks. The semester Examination will be worth 60 Marks. The question paper and semester exam will consist of two sections A and B. Section A will carry 36 Marks and consist of five questions, out of which student will be required to attempt any three questions. Section B will comprise of one or more cases / problems worth 24 marks.

**Course Outcomes**

1. The course will give students an overview of various environmental concerns and practical challenges in environmental management and sustainability.
2. Emphasis is given to make students practice environment friendly behavior in day-to-day activities.

**COURSE CONTENT**

**UNIT I: Introduction to Environment Pollution and Control**

1. Pollution and its types (Air, Water, and Soil): Causes, Effects and Control measures
2. Municipal Solid Waste: Definition, Composition, Effects
3. Electronic Waste: Definition, Composition, Effects
4. Plastic Pollution: Causes, Effects and Control Measures

**Legends:** L - Lecture; T - Tutorial/Teacher Guided Student Activity; P – Practical; C - Credit; AECC- Ability Enhancement Compulsory Course

\***Teacher Assessment** shall be based on following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

**UNIT V: Role of Individuals, Corporate and Society**

1. Environmental Values
2. Positive and Adverse Impact of Technological Developments on Society and Environment
3. Role of an individual/ Corporate/ Society in environmental conservation
4. Case Studies: The Bhopal Gas Tragedy, New Delhi's Air Pollution, Arsenic Pollution in Ground Water (West Bengal), Narmada Valley Project, Cauvery Water Dispute, Fukushima Daiichi Disaster (Japan), Ozone Hole over Antarctica, Ganga Pollution, Deterioration of Taj Mahal, Uttarakhand flash floods

**Suggested Readings:**

1. Rogers, P.P., Jalal, K.F. , Boyd, J.A.(Latest Edition) . **An Introduction to Sustainable Development.** Earthscan
2. Kalam, A.P.J. (Latest Edition) . **Target 3 Billion: Innovative Solutions Towards Sustainable Development.** Penguin Books
3. Kaushik , A. and Kaushik (Latest Edition). **Perspectives in Environmental Studies.** New Delhi: New Age International Publishers.
4. Dhameja, S.K. (Latest Edition). **Environmental Studies.** S.K. Kataria and Sons.New Delhi
5. Bharucha, E. (Latest Edition). **Environmental Studies for Undergraduate Courses.** New Delhi: University Grants Commission.
6. Wright, R. T. (Latest Edition). **Environmental Science: towards a sustainable future** .New Delhi: PHL Learning Private Ltd.
7. Rajagopalan, R. (Latest Edition). **Environmental Studies.** New York: Oxford University Press.

**Legends:** L - Lecture; T - Tutorial/Teacher Guided Student Activity; P – Practical; C - Credit;

**\*Teacher Assessment** shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

**Course Educational Objectives (CEOs):**

This course provides comprehensive knowledge of (A) production drawing, (B) assembly drawings and (C) orthographic Sectional views and use of (D) computer applications in production drawing.

**Course Outcomes (COs):**

On completion of the course the students will be able to:

1. Understand all drawing conventions, symbols and concepts of machine drawing Creation.
2. Convert functional specification of mechanical engineering parts and assembly requirements into manufacturing drawing in a manner consistent with standards.
3. Interpret manufacturing and assembly drawings and acquire skill in preparing production drawings pertaining to various designs.
4. Acquire knowledge of the applications of computers in design, parts creation, assembling and production drawing creation, mechanism and manufacturing activity.

**Syllabus**

**Unit – I**

**(8 Hrs)**

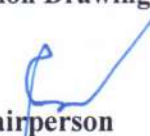

**Introduction of Machine Drawing and Drawing Conventions:** Introduction, classification of machine drawings, principles of drawing, elements of drawing, types of machine drawing, Drawing standards, Drawing Instruments, sheet layout and title block, Application of types of lines, lettering and numbering, Sketching, Dimensioning, screw threads, screw fastening bolt, nut, washer, screw, locking arrangements of nuts, foundation bolts, keys, cotter-joints and pin joint, pipe joint and valves, Riveted joints and welded joints, shaft bearings, brackets and hangers, shaft coupling, clutches and brakes.

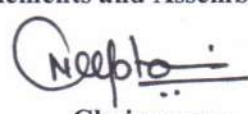

**Drawing Conventions and Symbols:** Conventional materials, Conventional breaks, Convention of rivets and bolts, welding conventions, Convention of roughness of surface, Convention of machine operation and parts, Convention of gear and gear transmission, convention of springs, Symbolic Representation of fasteners, Holes and bolts, profile section, pipe fittings and valve symbols, Electric symbol.

**Unit – II**

**(8 Hrs)**

**Production Drawing Elements and Assembly Drawings:** Introduction, geometric tolerance

**\*Teacher Assessment** shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

types and representation, dimensional tolerance types and representation, Limits and fits, hole basis and shaft basis system of fits, surface roughness, indication of surface roughness, roughness value and grade symbol, Assembly concepts, introduction, types, sequence of preparing the assembly drawing, sectional views, convention in sectioning, bill of materials, plotting techniques.

**Assembly drawing**

**Shaft joints:** knuckle joint, cotter joints and types etc.

**Keys & Shaft coupling:** Muff, Flanged, Flexible, Universal and Oldham's coupling etc.

**Pipe joint:** Flanged joint, Socket and Spigot joint, Hydraulic joint, Union joint, Gland & Stuffing Box etc.

**Bearing:** Plummer block, Pedestal bearing etc.

**Engine Parts:** Steam engine, Piston, connecting rod, Stuffing box, cross head, crank shaft etc.

**Unit – III**

**(8 Hrs)**

**Orthographic Conversion, Sectional and Interpretation of Views:** Principle and method of projection, orthographic projection, first angle, third angle, isometric, oblique and perspective projection, conversion of pictorial views into orthographic views illustrative problems,

**Sectional views and Interpretation:** Types of sectional views, full section, half section, partial section, removed section, revolved section, offset section, sectioning conventions. Reading of orthographic views, blue print reading, missing lines and views, identification of planes, illustrative problems.

**Unit – IV**

**(8 Hrs)**

**Production and Assembly Drawing Creation through CAD:** Introduction to CAD, Why CAD Software, Scope, objective, benefit and limitations, CAD Interface, Coordinate system, Create Objects and Modify Object. Layers & Blocks, Text, Table & Dimensions, Introducing Printing, Plotting, and Layouts.

**Drawing practice sheet:** Indicate the surface roughness symbols, welding symbols, tolerances, all production drawing symbols and conventions in drawing practice sheets of AutoCAD Mechanical.

**Parts Assembly, Visualization & Graphics standards:** Assembly Creation methods, Parts Modeling & Representation, Assembly Constraints, Mechanism & Mechanism Analysis, Mass Properties, Data exchange standards; IGES STEP CALS DXF STL.

**\*Teacher Assessment** shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

**Course Educational Objectives (CEOs):**

1. Basic understanding of various automotive components.
2. Identify various automotive systems and their components.
3. Impart knowledge of functions of various automotive components.

**Course Outcomes (COs):**

After learning the course, the students should be able to:

- (1). Students will be able to identify various automotive components.
- (2). Students will be able to identify different systems and their components.
- (3). Students will be able to describe functions of various automotive systems and components.

**Syllabus**

**30 Hrs.**

Components of chassis & body, components of automotive suspension system, components of steering system and steering mechanisms, components of transmission system, gear-box, differential systems, Component of IC Engine, automotive emission and its control, electrical systems of various light and heavy automotive vehicles.

**List of Experiments**

1. Describe various components of chassis and body of automobile.
2. Describe various components of steering system.
3. Describe various components of transmission system.
4. Describe the function of gear box and differential.
5. Describe various components of suspension system.
6. Describe various components of IC Engine.
7. Assemble & disassemble the part of 2 Stroke Petrol Engine.
8. Assemble & disassemble the part of 4 Stroke Diesel Engine.
9. Describe various components of emission & pollution control system.
10. Describe various components of electrical and control system.
