Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore

SEMESTER-III

MBAI301C ADVANCED HUMAN VALUES AND PROFESSIONAL ETHICS

SUBJECT CODE	SUBJECT NAME	TEACHING & EVALUATION SCHEME								
		THEORY			PRACTICAL		L	T	P	CREDITS
		END SEM University Exam	Two Term Exam	Teachers Assessment*	END SEM University Exam	Teachers Assessment*				
MBAI301C	Advanced Human Values and Professional Ethics	60	20	20	-	-	4	-	4	

Legends: L - Lecture; T - Tutorial/Teacher Guided Student Activity; P - Practical; C - Credit;

*Teacher Assessment shall be based on following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

Course Objective

The objective of the course is to disseminate the theory and practice of moral code of conduct and familiarize the students with the concepts of "right" and "good" in individual, social and professional context

Examination Scheme

The internal assessment of the students' performance will be done out of 40 Marks. The semester Examination will be worth 60 Marks. The question paper and semester exam will consist of two sections A and B. Section A will carry 36 Marks and consist of five questions, out of which student will be required to attempt any three questions. Section B will comprise of one or more cases / problems worth 24 marks.

Course Outcomes

1. Help the students to understand right conduct in life.
2. To equip students with understanding of the ethical philosophies, principles, models that directly and indirectly affect personal and professional life.

COURSE CONTENT

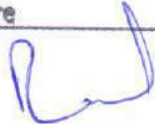

Unit I: Inculcating Values at Workplace

1. Values: Concept, Sources, Essence
2. Classification of Values.
3. Values in Indian Culture and Management: Four False Views, Value Tree
4. Eastern and Western Values; Values for Global Managers

 19/12/2020

2020-23

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore

Unit II: Professional Ethics

1. Ethics: Concept, Five P's of Ethical Power, Organisational Tools to Cultivate Ethics
2. Theories of Ethics: Teleological and Deontological
3. Benefits of Managing Ethics in an Organisation
4. Ethical Leadership

Unit III: Indian Ethos and Management Style

1. Indian Ethos and Workplace
2. Emerging Managerial Practices
3. Ethical Considerations in Decision Making and Indian Management Model
4. Core Strategies in Indian Wisdom and Ethical Constraints

Unit IV: Human Behavior – Indian Thoughts

1. Guna Theory
2. Sanskara Theory
3. Nishkama Karma
4. Yoga: Types, Gains; Stress and Yoga

Unit V: Spirituality and Corporate World

1. Spirituality: Concept, Paths to Spirituality
2. Instruments to achieve spirituality
3. Vedantic Approach to Spiritual and Ethical Development
4. Indian Spiritual Tradition.

Suggested Readings

1. Kausahl, Shyam L. (2006). *Business Ethics – Concepts, Crisis and Solutions*. New Delhi: Deep and Deep Publications Pvt. Limited
2. Murthy, C.S.V. (2012). *Business Ethics –Text and Cases*. Himalaya Publishing House: Mumbai
3. Chakraborty, S. K. (1999). *Values and Ethics for Organizations*. Oxford university press
4. D.Senthil Kumar and A. SenthilRajan (2008). *Business Ethics and Values*. Himalaya Publishing House: Mumbai

***Teacher Assessment** shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

Course Educational Objectives (CEOs):

Course Objectives: - The course is designed to enable students to: • enhance ability to think in a critical manner • Formulate and develop mathematical arguments in a logical manner • Improve their skills in acquiring new understanding and experience • Acquire an understanding of advanced mathematical analysis.

Course Outcomes (COs):

After the successful completion of this course students will be able to:

- understand different aspects of system analysis.
- transform industrial problems into mathematical models.
- analyse the PERT/ CPM technics and dynamic programming in multistage solution problem with real life applications.
- apply the concept of the probabilities and simple linear regression model to real life examples and sampling plans in production process.

MTCE2101	BS	System Mathematics & Mathematical Modeling	60	20	20	-	-	3	0	0	3

Syllabus

Unit I

Concept of a system and system analysis, Mathematical modeling, Introduction to Mathematical Programming Techniques viz. – Linear Programming, non – Linear programming, Dynamic Programming, game theory etc. Transportation problems their formulations and solutions.

Unit II

Linear programming, formulation, Graphical solution, Simplex method, BIG-M & Two Phase methods, Duality in LP, Revised simplex.

Unit-III

Network analysis, CPM-PERT techniques, Project Optimality analysis, Updating Dynamic programming, Stagecoach Problem and its D.P. solution.

Unit-IV

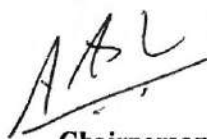

Measures of central tendency, Central Limit theorem, Statistical frequency distributions, Additional and multiplication law of probability, Bayes' Theorem, Binomial, Poisson, Normal, and 't', 'F' & Square Distributions, Tolerance limits, Confidence limits, Test of significance.

Unit-V

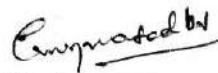

Linear and non-linear Regression analysis, Testing of Hypothesis, Acceptance sampling, Fundamentals of Simulation.

*Teacher Assessment shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

Course Educational Objectives (CEOs):

To gain the discrete knowledge of concrete and its technology, subject involves theoretical and practical approaches which helps in exploring the different kinds of concrete & its properties, so that students can understand the nature and their significance in the field of transportation Engineering

Course Outcomes (COs):

1. To identify the functional role of ingredients of concrete and apply this knowledge to mix design philosophy
2. To acquire and apply fundamental knowledge in the fresh and hardened properties of concrete
3. To evaluate the effect of the environment on service life performance, properties and failure modes of structural concrete and demonstrate techniques of measuring the Non-Destructive Testing of concrete structure
4. To develop an awareness of the utilization of waste materials as novel innovative materials for use in concrete

Syllabus

UNIT I

08 Hrs.

Solid Materials: Structure of solid materials, atoms and bonds, inter-atomic and intermolecular bonds, crystals; Classification of solids; Mechanism of elastic and plastic actions in tension, compression, pure bending, and torsion; Elastic and inelastic properties of solids; Dislocations; Strain hardening; Triaxial stress.

UNIT II

08 Hrs.

Creep: Components of creep fracture; Analysis of creep curves; Method of predicting creep strength; Designing of creep

Fatigue: Fatigue loading, mechanism, factors affecting creep fatigue properties; S.N. diagrams

Hardness: Relation between hardness of different atomic structure measurement of hardness with other mechanical properties

*Teacher Assessment shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

UNIT III

09 Hrs.

Concrete Materials: Cement, manufacture, composition, structure, hydrated cement paste, heat of hydration, test for physical properties, different types of cements, and properties of aggregates

Fresh Concrete: Workability, factors affecting, testing, vibration analysis of fresh concrete

Strength of Concrete: Nature of strength, factors affecting, Autogenous heating, maturity of concrete, fatigue strength, impact strength.

UNIT IV

09 Hrs.

Elasticity Shrinkage and Creep: Modulus of elasticity; Dynamic modulus; Poissons ratio; Early volume changes; Swelling, shrinkage, creep factors influencing creep nature; Rheological models; Effects and design for creep.

Durability of Concrete: Permeability of concrete; Thermal properties of concrete; Resistance of concrete to fire; Resistance to abrasion, electrical properties, acoustic properties, chemical attack.

UNIT V

08 Hrs.

Testing of Hardened Concrete: Destructive and nondestructive testing of concrete; tests on composition of hardened concrete; variation of test results, accelerated testing of concrete

Mix Design: Basic consideration, Factors in choice of mix Proportion; Methods of mix design.

*Teacher Assessment shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

Course Educational Objectives (CEOs):

1. To gain experience regarding the determination of properties of different types of soils and their behavior.
2. To provide an opportunity to learn how to measure the shear strength of the soil and its importance
3. To impart knowledge about the lateral earth pressure

Course Outcomes (COs):

1. Determine the index properties of the soil
2. To understand classification of soil.
3. Identify the suitability of the soil for different foundations

Syllabus:

UNIT I

06 Hrs.

Classification of Soils: IS classifications; AASHO classifications; CAA classifications
CBR and Group Index: Laboratory and field determination of CBR value; Effect of soaking; Modulus of sub-grade reaction

UNIT II

06 Hrs.

Compaction: Theory of compaction, factors affecting compaction, effect of compaction on soil, properties, measurement of field compaction and field methods of compaction and control.

UNIT III

06 Hrs.

Bearing Capacity: Skempton's analysis; Plate Load Test; Penetration Tests; General bearing capacity equation; Effect Of water table on bearing capacity
Stability of slopes: Types of slope failure; Bishop's slope stability analysis; Stability number

UNIT IV

06 Hrs.

Earth Pressures: Classical earth pressure theories; Effect of earth pressure on highway structures

4. IRC-51-1992, Guideline for the use of Soil Lime Mixing Road Construction

List of Practicals:

1. Determination of the natural content of the given soil sample.
2. To determine the Density of soil by Core Cutter method
3. To determine the specific gravity of soil fraction passing 4.75 mm I.S sieve by density bottle.
4. To determine the particle size distribution of soil by Sieve Analysis.
5. To determine plastic limit, liquid limit, shrinkage limit of given soil sample.
6. To determine the shearing strength of the soil using the direct shear apparatus.
7. To find shear strength of a given soil specimen by Vane shear test.
8. To determine bearing capacity of soil using CBR Test

Legends: L - Lecture; T - Tutorial/Teacher Guided Student Activity; P - Practical; C - Credit.

*Teacher Assessment shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

Course Educational Objectives (CEOs):

The aim of this course is to teach students about the traffic characteristic, traffic studies, highway capacity studies in traffic engineering

Course Outcomes (COs):

At the completion of the course the students will be able to

1. Understand the traffic characteristic.
2. Perceive the knowledge about traffic flow models.
3. Get knowledge about component parking and lighting.
4. Get knowledge about accident studies and highway capacity.

Syllabus:

UNIT I

08 Hrs.

Road User and Vehicle Characteristics: Road user; Vehicle Characteristics

Surveys: Different types of survey and studies; Speed and volume study; Parking survey, types of parking, parking meters, design of parking places Accident surveys.

UNIT II

08 Hrs.

Traffic Flow Models: Elements of traffic flow; Fundamental diagram of road traffic; Relationships between the variables; Greenshield's macroscopic stream model and microscopic flow models based on response; Stimulus approach, hydrodynamic analogy, queuing model.

UNIT III

08 Hrs.

Non-signalized Intersections: At grade and grade separated intersection; Channelization warrants; Weaving action at intersections; Delay models; Theoretical models for determining weaving capacity; Design of intersection

UNIT IV

08 Hrs.

Signalized Intersections: Different types of signals; Webster analysis; IRC method of signal design; Determination of effective green time; Optimum cycle time and timing diagram; Effect of left and right turning and heterogeneity; P.C.U. concepts; Ultimate capacity of whole intersection;
