## ABOUT SHODH 2022

Multidisciplinary approach in research is very much in vogue these days to address the problems of the society. Research has to be for the benefit of the society. It involves drawing appropriately from various disciplines to explore solutions to the problems beyond the normal purview of the disciplines. Modern research has become more project oriented. It draws from various disciplines to analyse and reach at a solution for the problem identified. Such approach facilitates in answering complex questions, as single discipline may not be able to find the solution. Multidisciplinary approach has thus become the need of the hour. With the advancement in the society and the improved quality of life, the problems have become more complex in nature. The solutions have to be holistic which makes involvement of various disciplines mandatory. Research calls for collaboration between various disciplines with each discipline maintaining autonomy while adhering to its assumptions, values, and methods.

Today multidisciplinary approach is considered the driver of innovation and research to solve real world problems. The present conference aims at bringing together researchers to address the current issues and problems and take out the solutions with the help of multidisciplinary approaches.

Research is benchmarking for any institution having multidisciplinary approach. In view of this Shri Vaishnav Vidyapeeth Vishwavidyalaya is organizing SHODH 2022 – 6 th Annual interdisciplinary doctoral conference on the theme 'MULTI DISCIPLINARY APPROACH TO RESEARCH: Emerging Paradigms'. This unique conference will be providing genuine platform to enthusiastic researchers from various disciplines to exchange and share their experiences and research findings and gain new insights for future research that would be beneficial to the society. The present doctoral conference aims to bring researchers to address the issues of how to maximize these benefits while avoiding potential pitfalls.
