## ABOUT CONFERENCE

Forensic science is the application of the methods of the natural and physical sciences to matters of criminal and civil law. Forensic science can be involved not only in investigation and interrogation of different kinds of crimes but also in matters in which a crime has not been committed but in which someone is charged with civil wrong such as will fraud, pollution of air or water or causing industrial inquiries.

As criminals are getting intelligent day by day, forensic science is also updating itself by introducing new methods and techniques. Conference provides a common platform for educators, researchers, scientists, lawyers and police personnel to exchange their knowledge and experiences and to acquaint with advancements in their field. Considering this fact SVIFS announce this virtual international conference on **‘RECENT ADVANCEMENTS IN FORENSIC SCIENCE’**.

The pattern of this conference has been designed in such way as to make participants enriched with various fields of forensic science.
