About Indore

Indore is the commercial capital of the state of Madhya Pradesh. The city was developed by Holkar queen Ahilya Bai, one of the famous queens of India. Apart from its historic significance and it is one of the major industrial cities of the state. It has become an education hub as it enjoys having several eminent educational institutions. The city contains both IIM (Indian Institute of Management) and IIT (Indian Institute of Technology). There are various places of tourism in and around Indore mainly Ujjain and Omkareshwar Jyotirlingas located within 100 Kms of Indore. Maheshwar the first capital of Holkar's and Mandu, the once thriving social -cultural center, more popular for the romantic legend of Baz Bahadur and Rani Rupmati is located within the proximity of 100 kms

About University

Shri Vaishnav Vidyapeeth Vishwavidyalaya is a private university established under Madhya Pradesh Niji Vishwavidyalaya (Sthapana Avam Sanchalan) Adhiniyam in 2015 at Indore (India). The University has been established with a vision to be leader in shaping better future for mankind through quality education, training and research. It shall pursue the mission to make a difference in sustaining the growth of global societies by developing socially responsible citizens. Value based education being at the helm, the University shall promote endurance, excellence, fairness, honesty and transparency as its core values. Some of the objectives of the University are as under:

1. To provide teaching and training in higher education and make provision for research and dissemination of Knowledge.

- * Shri Vaishnav School of Law (SVSL)
- * Shri Vaishnav Institute of Commerce (SVIC)
- * Shri Vaishnav Institute of Agriculture (SVIAG)
- * Shri Vaishnav Institute of Home Science (SVIHS)
- * Faculty of Doctoral Studies and Research (FDSR)

Conference Theme

Education has played an important role in growth and development of human race. It has changed the world over the period of time. Education has become imperative and every effort is made to make it available to most but still there are gaps. After the introduction of modern education in India, major changes have been seen on the account of educational philosophy and techniques. Students are introduced to various new subjects, classroom environment has changed to confined walls, the link with nature and comprehensive development has slowly drifted away. Today, the system of education is more about specialization and memorizing for exams. This system of modern education acts as a barrier for multiple skill development amongst students. NEP in Higher Education aims to address these drawbacks of the present education system. New Education Policy 2020 is one such move and because of its realistic approach it will make education more inclusive, holistic and multidisciplinary and at the same time it looks forward to improve the skill set of the students.

Historically Indian education in ancient times emphasized on multidisciplinary and holistic approach and had been a leader in field of education. This system was approved by great teachers and philosophers of the world like Kautilya, Banbhatta, Plato, Aristotle etc. The ancient literature is full of instances where this type of education system is mentioned and was practiced. The Indian Gurukul System is the best example of this approach where a student would stay in the ashram under a guru and learn multiple disciplines like science, mathematics and geometry along with other skills like dance, singing etc. They also learned various skills besides ethics, morals, values etc. The major focus always remained on teaching an attitude having compassion for others so that the individuals could help the society rather than focusing on one's own welfare only.

Change is the Law of Nature. If change occurs by choice, it is accepted as an opportunity but unexpected change creates resistance and irritability in behaviour and personality. Whenever the new things come around, people form either positive or negative attitude towards the changes. As far as the New Education Policy in Higher Education is concerned it is assumed that it must have positive impact on masses. The aim and objective of the implementation of NEP in Higher Education is to lessen the psychological, social pressure on the students and enhance their psychosocial empowerment so that they can serve society better.

Keeping these things in the backdrop **UDGAM 2021**, the National Conference on the Theme **'Imagining Higher Education in Social Sciences, Humanities, Arts and Journalism and Mass Media'**, has been organized to provide a common platform for Experts, Academicians, Research Scholars to have deliberations via virtual mode and share their perspectives.

Sub-themes of the Conference

- * New Road Maps for International Relations Studies in Higher Education: 2020
- * Minorities and Gender Perspective in Higher Education
