

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore
Shri Vaishnav Institute of Textile Technology
Choice Based Credit System (CBCS) in Light of NEP-2020
Generic Elective for UG Courses
(2021-2025)

COURSE CODE	CATEGORY	COURSE NAME	TEACHING & EVALUATION SCHEME									
			THEORY			PRACTICAL			L	T	P	CREDITS
			END SEM University Exam	Two Term Exam	Teachers Assessment*	END SEM University Exam	Teachers Assessment*					
BTTX900	GE	MEDICAL TEXTILES	60	20	20	-	-	3	0	0	3	

Legends: L - Lecture; T - Tutorial/Teacher Guided Student Activity; P – Practical; C – Credit.

***Teacher Assessment** shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

Course Educational Objectives (CEOs):

1. To provide the introductory knowledge about textile materials and medical textiles.
2. To impart the knowledge of various properties of Medical Textiles as per different domains of health care.
3. To expose the knowledge of biocompatibility and related characterization methods of Medical textiles.

Course Outcomes (COs):

After completion of this course the students are expected to be able to demonstrate following knowledge, skills and attitudes.

The students will be able to:

1. Familiarity of healthcare related problem.
2. Comprehend just requirements for a textile material to be used as medical textile.
3. Identify new scope and design of medical textile.

Syllabus:

Unit-I Introduction to Biomaterials

9 HRS

Introduction to biomaterials and definition & properties, Classification – Metals, polymers, ceramics, composites properties and application as biomaterial. Characterization of materials - Mechanical Properties, surface properties, electrical properties and visco-elasticity, Metallic implant materials – Stainless steel, Co-based alloys, Ti and Ti-based alloys.

***Teacher Assessment** shall be based following components: Quiz/Assignment/ Project/Participation in Class, given that no component shall exceed more than 10 marks.

Unit-II Introduction to Polymers and Fibres

10 HRS

Basic concept of polymer, their classification, methods of polymerization, molecular weight and its measurement, distribution and importance. General classification of fibres. Structure, properties, uses, advantages and disadvantages of most common natural and manmade fibres.

Unit-III Introduction to Biocompatibility

8 HRS

Biocompatibility-Definition. Factors affecting biocompatibility-Carcinogenicity, mutagenicity, cytogenicity, toxicity. Blood Compatibility-Factors affecting blood compatibility. Material response: Swelling and leaching, Corrosion and Dissolution, Reaction of Biological molecules with biomaterial surfaces. Testing of implants: Methods of test for biological performance-In vitro and In vivo implant test methods. Clinical testing of implant Materials, Design and selection of implant materials-Design Process.

Unit-IV Health care domain specific Medical Textiles I: Suture, Wound Dressing

7 HRS

Medical textiles market. Classification of medical textiles. Sutures: Classification based on origin, physical configuration and absorbability, properties of sutures, Evaluation and standards. Wound dressings: Functional requirements, materials used, wound healing mechanism and factors affecting wound healing, Evaluation and standards.

Unit-V Health Care Domain Specific Medical Textiles II: Healthcare & Hygiene

Antimicrobial Finish Based Materials

8 HRS

Healthcare and Hygiene Products: Functional requirements, materials used, design procedure, Evaluation and standards. Antimicrobial finishing of medical textiles: Need for antimicrobial finishing, antimicrobial agents and their working mechanism, Antimicrobial test methods.
